Min Sans Stencil is a high-contrast sans-serif typeface that brings a more industrial and graphic character to the refined construction of the original Min Sans. Introduced in 2023 and released as a new family, it reinterprets Min Sans's calligraphy-influenced structure through a modular stencil framework.

While maintaining the clean contours, sharp notches, and expressive contrast of the original, the stencil version adds precisely placed breaks that enhance rhythm, structure, and legibility. These mechanical cuts introduce a visual tension that feels bold yet controlled,

making the design well-suited for contemporary editorial, signage, and branding applications.

Its calligraphic roots paired with modular stencil construction create a typeface that feels both elegant and urban. The result is a typeface that expands Min Sans into a new expressive space—retaining its sophistication while adopting a more architectural and utilitarian tone.

Min Sans Stencil offers a crisp alternative to the original family while staying grounded in the same design language.
